

1. Summarising Notes

Prompt

Summarize DBMS notes into simple bullet points for exam revision.

AI Response

DBMS (Database Management System) is software used to store and manage data efficiently.

Key points:

- DBMS helps organize data
- It reduces redundancy
- It improves data security
- SQL is used to manage databases

Why Prompt Worked

The prompt clearly asked for a summary and specified simple bullet points, so the output became short and easy to understand.

2. Generating a Study Plan

Prompt

Create a 7-day study plan for DBMS for a B.Tech student studying 2 hours daily.

AI Response

Day 1: Introduction to DBMS and database concepts

Day 2: ER Model and relational model

Day 3: SQL basics and queries

Day 4: Normalization concepts

Day 5: Transactions and concurrency

Day 6: DBMS architecture and recovery

Day 7: Revision and practice questions

Why Prompt Worked

The prompt clearly mentioned the subject, duration, and daily study time, helping AI generate a structured plan.

3. Creating Interview Questions

Prompt

Generate technical interview questions for a computer science student on Python and DBMS.

AI Response

1. What are Python lists and tuples?
2. What is normalization in DBMS?
3. Explain primary key and foreign key.

4. What are loops in Python?
5. What is SQL?

Why Prompt Worked

The prompt clearly specified the technical subjects, helping AI produce relevant interview questions.

4. Writing a Resume Summary

Prompt

Write a resume summary for a 3rd-year B.Tech CSE student interested in software development.

AI Response

Motivated third-year B.Tech Computer Science student with an interest in software development, problem-solving, and programming. Eager to improve technical skills and gain practical experience through projects and internships.

Why Prompt Worked

The prompt clearly included student background and career interest, making the response relevant and personalized.

5. Creating a Lesson Plan

Prompt

Create a one-week lesson plan to learn Python basics.

AI Response

Day 1: Python introduction and installation
Day 2: Variables and data types
Day 3: Conditional statements
Day 4: Loops in Python
Day 5: Functions
Day 6: File handling
Day 7: Revision and practice

Why Prompt Worked

The prompt clearly defined the topic and duration, so AI generated a structured learning plan.
